

## ABOUT

# GREEN PARADISE PIGMENT

**GREENPARADISE PIGMENTS** was established with the aim of manufacturing and exporting Pigment Green-7, Pigment Green-36, Pigment Alpha Blue and Pigment Beta Blue. We have a state-of-the-art manufacturing facility at Dahej, Gujarat a fastest growing chemical hub of INDIA.

Our Technical Director and founder Partner Mr. F.R Singh having 40 years of experience in pigment industry and was associated with Clariant Chemicals (India) Ltd. and many other prominent pigments manufacturers before venturing in to this new business.

Through our innovative and rigorous quality products, as well as our research & development team we have been able to deliver solutions that help our clients in attaining success within diverse markets. Our employees have great knowledge of manufacturing the pigment and they use all their extraordinary skills in the creation of these products. Because of their hard work, we have acquired a reputed position in the industry and amongst our clients. This is the truth that we are already a successful company but this does not stop us from growing more.

## MISSION

To become leading global manufacturer and one of India's largest exporters of pigment products.

## VISION

Our vision is to be a globally recognized pigments provider by supplying excellent quality and environment-friendly products.
