

Tight Head Drum Range

Introducing Blowpack's new range of Tight Head Drums, specially designed to international standards employing the most recent blow moulding technology to create the highest standard drum possible.

Specialist Technology:

- Advanced processes and systems guarantee consistent drum wall thickness on a consistent basis.
- Multilayer extrusion technology enables the inclusion of recycled HDPE in the drum (when available), whilst maintaining the drum's rigidity and stability.
- This technology enables the inside layer to consist of virgin HDPE, enabling the safe containment of sensitive products including food.
- Drums can also be surface treated with fluorination to protect highly permeable products.
- Designed for maximum drainage of contents when decanting.

100 L

150 L

210 L

250 L

Tight Head Drum Range

Drum Closures:

- The range has been designed with a neck diameter of 52 mm in line with international standards
- The standard closures are available in two variants: non-vented and vented
- Other varieties available

Drum Colours:

- Blue is the industry standard
- Other colours available

Benefits:

- ISO Compliant
- Tamper evident
- Stackable and can be palletised
- Designed for optimum drain-ability for effective decanting of contents

Drum Sizes:

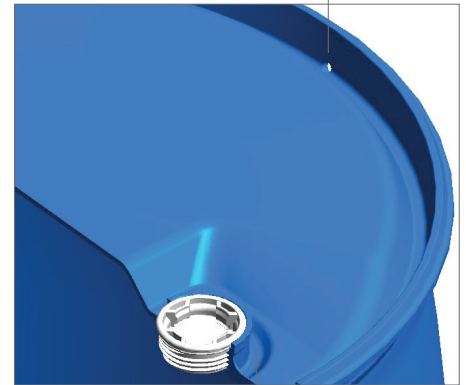

Four convenient sizes:

- 100 L
- 150L
- 210L
- 250L

Tamper Evidence:

- Secure tamper evidence is available which locks directly into the recess of the closures. No tools are required for application or removal

Drainage holes are strategically punched into upper L-Ring to enable external liquid and rain run-off.

The upper L-Ring protects the closures from fracturing during transportation and handling.

UN Certified.
 Approved for Transport of
 Dangerous Goods for Group II on
 rail, air, marine and road

Drum is fully recyclable
 Made from multiple layers of
 100% HDPE

Safe for food contact
